

OM500 IP-PBX Release Notes

Version: V2.1.5.90.P1 Date: 9/6/2015

1.1 Firmware Modules

Component	Version
Hardware version	Rev 2.0.0
Software version	Rev 2.1.5.90.P1
Kernel version	Kernel 2.0.12.P1

New Features

None

Improvements

1. The voice prompt “Enter the wake-up call time using military time. For example, zero seven three zero for seven thirty in the morning. Please hang up when done” will be played to the extension who dial *36.
2. Optimize the system voice prompt.

Bugs Fixed

1. Fixed the issue on unable to change the outbound call setting for DID trunk from **Prohibit** to **Allowed** on **Trunk > IP trunk** page.
2. Fixed the issue that, under certain conditions the trunk cannot be released after the call is disconnected.
3. Fixed the issue that only 312 IP trunks at most can be displayed on **Trunk > DID/DOD** page.
4. Fixed the issue that no recording file is emerged on the recording server for a call whose on-demand call recording is enabled by dialing *#.
5. Fixed the issue that, occasionally, the device is inaccessible with only the PWR indicator is lighted after the device is powered on.
