

# OM Series IPPBX Software Release Notes

Version: Rev 2.1.5.98     Date: Jan. 25, 2016

## Firmware Modules

<b>Model</b> <b>Component</b>	<b>OM20</b>	<b>OM50</b>
Software Version	Rev 2.1.5.98	Rev 2.1.5.98
OS Version	2.0.12	2.0.12mt

## New Functions

1. Supports importing the multi-level IVR configuration file via Web GUI.

## Functions Improved

1. Supports E.164 numbering plan with plus sign on **SIP trunk ID** and **Username** on **Trunk > IP trunk > Add** page.
2. Supports modification of the extension numbers in batch on **Extension > Analog** page.
3. Supports the change of IP address on **Basic > Network** page to take effect immediately.
4. Supports dial tone detection on FXO port.
5. Improves the robustness of the access to the internal storage device.
6. Supports PSTN failover upon the failure of DNS lookup for SIP server address.

## Problems Fixed

1. Fixed bug that caused INVITE message carried incorrect local SIP port number.
2. Fixed bug that may corrupt the routing table at the beginning of a month.
3. Fixed bug that could cause incoming call to analog trunk fails.
4. For a call to an unreachable IP extension of a hunt group, it will be directed to an alternative extension within the same group after INVITE timeout.
5. Fixed bug that cause duplicate call records in the CDR server.
