WROC2000 Software Release Notes

Version: 2.1.5.91.P4   Date: 10/27/2015

Component Updates

Component	Version
Software Version	Rev 2.1.5.91.P4
OS Version	Kernel 3.4.2.2

New Functions

None

Functions Improved

1. Add options such as **Default SIP registrar**, **SIP proxy server**, **Increments of port number** on **Voice** > **Trunk** > **IP trunk** > **Registration** page.
2. Improve the stability of the Wi-Fi connection.

Bugs Fixed

1. Fixed the issue that a reboot could cause the loss of network configurations.
2. Fixed the issue that the outgoing call through a SIP trunk would not failover to the PSTN upon the SIP INVITE timeout.
